

To have the proper functionality in Excel 2007 with the Incident Analysis Tool, before downloading the software, please follow the instructions below:

1. Open Excel 2007.
2. Hit the Office button in the upper left-hand corner.
3. Hit the Excel Options button in the bottom right-hand corner.
4. Check off "Show Developer Tab..." and click OK.
5. Click on the Developer tab (far right)
6. Click on the Macro Security button.
7. Check off "Enable all macros..." and click OK.
8. Open the Incident Analysis Tool and it should work properly.
